

Our TECH Services

"I was reading a solicitation once...and a word was used that not only made sense in describing who we are, but actually felt right too: **versatilist**"
-Aditya, Founder

Product Management:

1

Drive the development of engaging and interactive digital products for your organization through creativity & expertise:

- Establishing your organization's mission and vision in both the technical and overall aspects
- Developing a roadmap and action plan for launching new products and features

Product Ownership:

2

Lead diverse teams in delivering product capabilities & features efficiently:

- Experience & certified Product Owners (CSPO).
- Serving as Scrum Masters using SAFe Agile and DevSecOps methods.
- Supporting Product Manager's to ensure Vision is realized and features from the Pathway are released timely & affordably.

Product Analysis:

3

Often called "business" analysts, connecting with diverse stakeholders to identify pain points and generate actionable insights that optimize product performance:

- Needs ("requirements") gathering
- One-on-One and focus groups with stakeholders
- Digitally document create user stories for Product Team
- Passionately demonstrate new product features with ease to communicate impact

Product Development & Engineering:

4

A multidisciplinary team of developers (PdD) and engineers (PdE) using innovative programming and coding tools to tangibly bring your products to life

Product Testing:

5

Digitally lead and conduct software testing to identify and resolve bugs, and errors:

- Setting up Validation & Verification testing programs
- Using Azure DevOps, Jira, and HP Quality Center to digitally deliver testing services
- Creating & performing unit, functional, and regression test cases

Product Training:

6

Compassionate trainers for all stakeholders ensuring product understanding for increased usage:

- Deploying Instructional Design techniques to create & distribute educational materials, digitally
- Focusing on One-On-One instead of group settings for user-specific training needs
